

MASTERTHERM | HOMELY | AGILE OCTOPUS INTEGRATION

 100% Renewable Electricity  Plunge Pricing  Smart System

**A SMART SYSTEM
WHICH
SELF-OPTIMISES
TO SAVE YOU
MONEY**

WHAT DOES THIS MEAN FOR YOU?

MasterTherm integration with Agile Octopus can achieve up to 35% additional savings on your heating and hot water on the already low costs of running a heat pump.

*"A SMARTER
SYSTEM
DESIGNED TO
SAVE YOU
MONEY WHILST
USING MORE
SUSTAINABLE
ENERGY"*

HOW DOES THE AGILE TARIFF WORK?

Smart meters allow customers' electricity use to be calculated and billed in half hourly periods, and see the half hourly prices of electricity as it changes throughout the day. Agile's half-hourly prices reflect the real price of electricity that Octopus buys a day ahead, this is made up of the wholesale costs and extra charges for use of the grid.

When integrated with a Homely smart meter, MasterTherm heat pumps will operate when electricity costs less whilst still achieving your preferred temperatures and heating schedules. This solution will significantly reduce electricity costs

Agile Octopus includes Price Cap Protect, which ensures you'll never pay more than 35p / kWh for your electricity, guaranteed. Even if you continue to use your electricity as normal, you'd still save money compared with tariffs from the big 6 energy providers.

"The average Agile customer would save £188 per year compared to legacy standard variable tariffs, and £45 per year compared with Octopus Energy's 12 month fixed tariff" Octopus Energy Research Report 2020

WHAT OUR CUSTOMERS ARE SAYING....

"My system with Agile Octopus and Homely is up and running and has reduced my electricity consumption by 35%. Very happy!"

Anthony Phillips, MasterTherm Customer

HOW DOES IT WORK WITH MY HEAT PUMP?

Connecting your MasterTherm heat pump to Homely enables you to take advantage of the Agile Octopus tariff. The innovative system will learn how long your house takes to heat up and cool down. It then looks at weather forecasts and electricity prices to make sure your house is heated at the cheapest times throughout the day to meet your desired temperatures. **All you have to do is download the Homely App, set your temperature preferences just once, and that's it. Your heat pump will be operating as cheaply as possible using cutting edge technology, fair electricity pricing and fully renewable energy.**

GETTING SET UP - 3 SIMPLE STEPS

1. Visit Octopus Energy and apply for an account. You can use our [referral link](#) which will qualify you for £50 credit.
2. Once set up with Octopus, you'll need to purchase the [Homely set up package](#) which is £25.
3. Homely will be able to remotely connect to your MasterTherm heat pump and set up your connection to Octopus Agile.
