

# ARISTON

The home of sustainable comfort

Modern design,  
**advanced  
features**

**Sensys Net HD**  
Smart System  
Interface

**A new definition of comfort control,**  
with a sleek design and an intuitive interface.

# Modern design, advanced features

The new Sensys Net HD is designed to help you achieve **superior comfort in the most efficient and intuitive way**.

With its advanced capabilities, the new modulating chrono-thermostat allows you to create a **custom heating experience** using multi-temperature programming and multizone control, **optimize your energy usage and save on bills**.

Distinguishing itself with sleek design, elegant materials and high-tech interface, not only will Sensys Net HD **simplify your everyday life** with precise and flawless comfort control, but will also add **a touch of class to any home**.

CONTROLS**

# Advanced Capabilities

Achieve superior comfort at home, tailored to your needs and preferences.

## MULTI TEMPERATURE PROGRAMMING

Create a daily and **weekly temperature schedule** to always have the right temperature at the right time.

## MULTI-ZONE TEMPERATURE MANAGEMENT

Set up **different temperatures for up to six different zones** within your home and control them independently.

## SPECIAL FUNCTIONS

Choose between **different modes and special functions**, depending on your needs (e.g. Silent mode HHP, Boost HPWH function, Holiday mode, Comfort function, Auto function, etc.).

## Comfortable temperature when and where you need it

### 7:00 AM

The **living space** is heated up to **21°C**, so you can wake up to a warm house.

### 9:00 AM

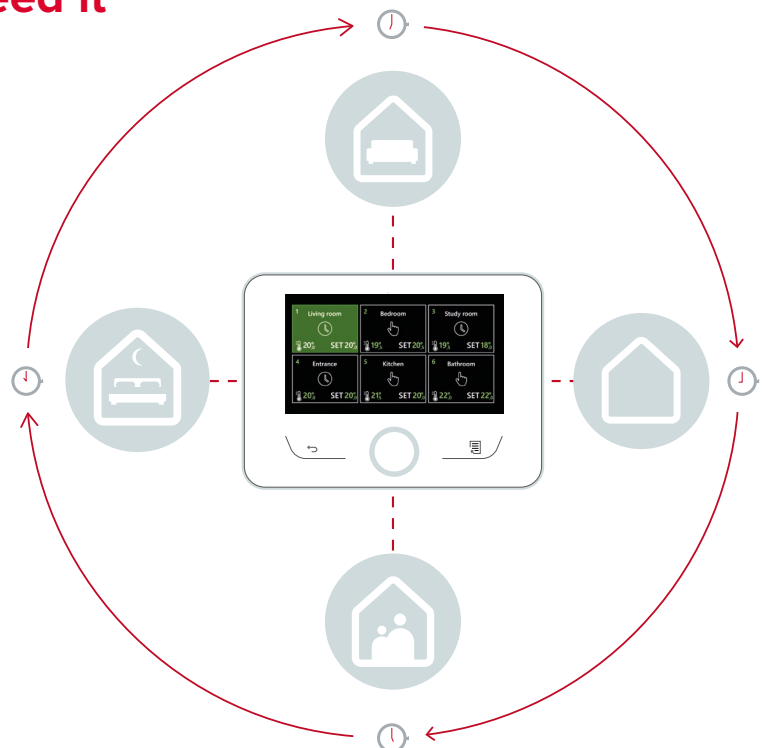

When you **leave your home** for the day, Sensys Net HD lowers the temperature of **all rooms** to **16°C** to let you save money.

### 05:00 PM

The heating system heats the **living space** up to **21°C**, so that the temperature when **you come home** is welcoming toasty.

### 10:00 PM

The temperature of the sleeping area reaches **18°C**, making **all the bedrooms** in your home ready to let everyone enjoy a good night of quality sleep.

# Sustainable Efficiency

Monitor your gas and energy consumptions, improve your usage habits and reduce not only your environmental footprint, but your energy bills too.

## MODULATION ALGORITHM

Thanks to its **advanced modulation algorithm**, the new modulating chrono-thermostat enables your heating system to run at its most efficient.

## GRAPHS AND CHARTS

The easy-to-read **graphs and charts** let you keep track of your consumptions and costs, so you can learn how to optimize your usage and contribute to a better future for our planet.

# Easy Interaction

Browse through menus, adjust basic and advanced settings and programme your comfort in the easiest and most intuitive way.

## WIDE COLOUR DISPLAY

The **high-resolution colour display** (TFT 4.3") and the back-lit control panel ensure perfect readability also in the dark.

## TOUCH CONTROLS

The **touch controls** on the side and the **push-knob adjustment** are simple and highly intuitive.

Designed  
to look great  
**into any home**

# Smart Connectivity

Sensys Net HD is the key to access the smart home world and simplify your daily life.

## Ariston NET APP

Sensys Net HD is equipped with **always-on connectivity**. That means you can manage it remotely, optimise energy consumption and receive continuous remote assistance\* direct to your phone or tablet using the Ariston NET app.

### All the advantages of Ariston NET

Easy
